Data Platforms & Tools: MySQL, Google BigQuery, Dataform (dbt equivalent), Google Cloud Storage, Metabase
Data Governance & Integration: data curation, integrity & documentation, schema validation, regulatory reporting
Infrastructure & DevOps: Docker, Jenkins (CI/CD), Git, JSON, REST APIs
Languages: Cantonese (Native), Mandarin (Native), English (Full professional proficiency)

WORK EXPERIENCE

Junior Data Manager

May 2024 – Present

Zapmap

Bristol, UK

- **Owned data curation, integrity, and documentation** for shared tables used across 5+ downstream pipelines, restructuring legacy tables into curated models with column level docs and automated test assertions.
- **Built statutory reporting pipelines** for the UK Department for Transport, processing 46k+ GB into compliant outputs, with data quality tracking across 40+ external partners.
- **Designed production ELT pipelines** using Dataform on BigQuery, migrating legacy ETL into a version controlled, cloud native architecture with clearer lineage.
- **Led cross functional incident response** during a critical platform outage, presenting a structured after action report at company All Hands.
- **Engineered an internal R package** to automate recurring transformations, with documentation supporting team wide adoption.
- **Led migration of an ad hoc report into a governed, schema validated pipeline**, liaising with a data analyst stakeholder to define requirements and deliver the solution.
- **Established governed AI assisted engineering workflows** (Claude Code) to accelerate table migrations and documentation, while retaining full accountability for logic and data integrity.

Data Assistant

March 2023 – May 2024

Zapmap

Bristol, UK

- **Validated incoming data feeds** from 20+ external partners via an internal admin platform, proactively identifying and escalating recurring data issues to Data Managers.
- **Maintained data governance documentation** and supported schema changes in production MySQL systems, building infrastructure knowledge that led to promotion into a Data Engineer role.

Data Science Team Leader

February 2023 – April 2023

180 Degree Consulting

Bristol, UK

- **Delivered a Python based data pipeline** for a non profit client, leading a team of four to automate volunteer scheduling analytics and build a real time call management dashboard from scratch.
- **Led stakeholder requirements gathering** to translate business needs into technical specifications, managing delivery end to end across scoping, build and handover.

EDUCATION

University of Bristol

Bristol, UK

Master of Science by Research, Population Health Sciences

2020 – 2023

- Thesis: *Purchasing and consumption of over the counter antibiotics: a mixed method approach to secondary data*. Secondary analysis of national health purchasing and prescribing datasets, conducted under institutional ethics and data governance approval.
- Supported by the University of Bristol UK China AMR Program Scholarship.

Shandong University

Jinan, China

Bachelor of Laws, Anthropology

2016 – 2020

- GPA: 86.35/100

PUBLICATION

Cong W, Stuart B, Alhusein N, Liu B, **Tang Y**, Wang H, et al. Antibiotic Use and Bacterial Infection in COVID 19 Patients in the Second Phase of the SARS CoV 2 Pandemic: A Scoping Review. *Antibiotics*. 2022;11(8):991. DOI: 10.3390/antibiotics11080991

PROJECTS

Personal Portfolio Website | *Hero, GitHub Pages, Umami (self hosted analytics on Vercel)*

2023 – Present

- Built and maintain a multi language static site with custom domain, CI/CD via GitHub Actions, and self hosted analytics, with end to end ownership across deployment, monitoring and iteration.
